RE: (WT Docket No. 11-65) In the Matter of applications of AT&T Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

Dear Chairman Genachowski:

The Delta Citizens Alliance (DCA) is an organization that cares most deeply about vulnerable individuals, groups and communities whose aspirations for a better quality of life are frustrated or not realized due to lack of access to information, knowledge and resources. Because the voices of these individuals, groups, and communities are often not heard and appreciated we are submitting these comments concerning the AT&T and T-Mobile merger on their behalf.

The AT&T and T-Mobile merger will assist as DCA looks to create lasting change by enabling vulnerable individuals, groups and communities to communicate directly with one another and with decision-makers at the local, state and regional levels. The merger will achieve this by deploying advanced wireless access to many remote and rural communities, such as those found in the Delta-region. Additionally, the merger will enable the use of applications that will promote civic involvement and government engagement.

Promoting the use of applications that enable direct communications with decision makers allows those living in remote and rural communities to build and seek consensus on important issues that affect their daily lives. It is for these reasons the Delta Citizens Alliance encourages the Federal Communications Commission to look favorably upon the AT&T and T-Mobile merger.

Sincerely,

Larry Williams
Delta Citizens Alliance
